- 3) Open discussion

LET YOUR VOICE BE HEARD!

THANK YOU FOR YOUR SUPPORT!

UIS meeting Feb 2020

Goal setting workshop Jan 2020

Meet the Mentor Series Feb 2020

Imposter Syndrome Series

Impostor Syndrome is a pervasive feeling of self-doubt, insecurity, or fraudulence despite often overwhelming evidence to the contrary. This feeling impacts every group differently.

As a way to provide transparency, and support to our members, we are starting a series highlighting how imposter syndrome impacts students underrepresented in science. Submit anonymously [HERE](#). Opinions, thoughts, coping skills are all welcomed and will be shared in April's newsletter.

Check out these articles below highlight the impact of imposter syndrome on diversity and inclusion initiatives

S.T.E.M. SPOTLIGHT

Meet Roxana Mesias PhD candidate MTA: NEUROSCIENCE

Roxana is a member of Dr. George Huntley and Dr. Deanna Benson's laboratories where she studies the role of an autism-linked gene in the development of the corticostriatal circuit which is important for motor and cognitive functions. She is the recipient of the NIH-NIMH F31 fellowship, and is apart of the Yale Ciencia Academy cohort. With all of her academic accomplishments, she is also a loving parent to a energetic toddler! Let's congratulate Roxana, for all of her outstanding achievements !
